

## Data Analysis Internship at a Startup in San Francisco, CA

Host Company ID: I-0479309

**Internship Duration:** 18 months max. (paid)

### Company:

We are a startup based in San Francisco and offer a comprehensive set of truly data-driven, next generation benchmarks that provide insights and recommendations to enable better decision-making and superior business performance. Our product is a tool that allows CEOs to view their own metrics in the context of peer companies.

### Internship Position:

This is a Data Analysis internship: The intern will create new data models, work on metrics projects and simulations as well as create and implement algorithms. The intern will also work on product enhancement where they will test product features and get customer feedback.

### Requirements:

- Very good English skills
- Background in data analysis/data engineering
- Interest in the startup scene
