

## Web Design & Web Programming Internship at a Tour Operator

# in San Francisco, CA

Host Company ID: I-0009877

Internship Duration: 12 months max.

#### Compensation:

\$ 2000/month for a 12-month program, payment for shorter program duration negotiable

#### Company:

Founded in 2002, we are a San Francisco Sightseeing Tour company that specializes in tours for people who generally do not like to take tours. Our clientele is very independent and likes to venture to places where most tour companies don't go to. Due to the small size of our groups, our guests receive a more personalized and exclusive experience from us. Our tours offer a distinct "traveling with friends" feel, so that most people interact with each other and so we are able to visit locations larger vehicles do not. For example, we have a short hike up to the Giant Sequoia grove on our one day Yosemite tour from San Francisco. On our California wine country tours, we visit small family-owned boutique wineries (too small for large buses) that produce such limited quantities you can only buy their wine at their winery!

#### **Internship Position:**

The intern will be trained in creating design elements for online and offline media including print. The intern will learn how to follow the company's corporate identity and branding guidelines, how to create intelligent website designs and gets the opportunity to come up with new ideas on how to make the website better and easier to read.

# intrax
