| Company Description | <p>The company was one of the first companies in Europe to market ideas and technologies and to realize the entire potential of patent value. Our commitment goes far beyond the usual market routine for patents and aims to develop commercial patent models which are market-ready.</p> <p>Patent and technological expertise, international experience in distribution and marketing as well as in-depth knowledge of business management and development form the basis of our business model. We provide comprehensive technology management to owners of technologies (companies, banks, research scientists and inventors) in order to create added value for our clients.</p> <p>We search for and identify technologies, check them with respect to their chances on the market and bring them to market maturity, prepare them for sales, develop business models, and bring together sellers and users, accompanying them until market launch.</p> <p>The company has 6 employees.</p> |
| Sample Projects | <ul style="list-style-type: none"> Marketing of new technologies by inventors and wholesale customers such as <i>Deutsche Telekom</i> or <i>Freie Universität Berlin</i> (Re)search interested parties Conduct market analyses |
